3D VIEW

Steiner porro prism binoculars are extremely robust and reliable. Ideal, therefore, for rigorous applications in any terrain, including the high seas. The porro system naturally delivers a realistic 3D image with maximum depth of field and outstanding clarity, allowing pinpoint laser range finding up to 1,700m at the touch of a button in a compact pair of binoculars. Even over vast distances, the user can clearly see whether one object is in front or behind the other.

Once adjusted to the eyes, a pair of porro binoculars will always provide a sharp image from 20 m, without the need for refocusing – and is therefore ideally suited for rapidly changing distances.
